

# POST SURGERY QUESTIONS

## For Your Neurosurgeon

---

Hope for HH has created a list of questions to help guide your conversation with your medical provider. These conversations can feel overwhelming and confusing. To maximize the time with your provider, we recommend you identify which questions best apply to your situation and use them as a starting point for the discussion. Being prepared can lessen the fear and improve collaboration.

- 1 Are there any activity/travel restrictions after being discharged from the hospital?
- 2 Who should I call if questions arise post-surgery? After hours, who should I contact?
- 3 What should the next few days look like before we return for follow up visit?
- 4 What big things should I watch for over the next few days?
- 5 What symptoms would warrant a trip to the Emergency Department?
- 6 If I have a seizure post-surgery, does that mean it was not successful?
