

For the ONE
in 200,000
children &
adults.....

- Who experience unusual symptoms including uncontrollable laughing (gelastic) and other seizures, endocrine disturbances, early puberty and severe rages
- Whose rare brain lesion was not detected on an EEG, missed on brain imaging or misdiagnosed as a gastrointestinal, psychiatric or behavioral condition
- Who suffer unsuccessful treatments and long-term, life altering complications of surgery
- Who live with cognitive and behavioral deterioration, learning disabilities, and insurance discrimination

| Grace Webster | diagnosed at 15 months with HH |

NOW there is.....
